Dear Hiring Manager,

I am writing to express my interest in Data Science related position at Petronas. I am currently working as a Risk Analyst at Etiqa Insurance & Takaful, where I have developed machine learning models and led various digitalization initiatives. I am eager to bring my data science skills and analytical experience to the company and contribute to your team.

In my current role, I have successfully developed an in-house e-KYC solution, utilizing machine learning and computer vision techniques, as well as built predictive models for fraud detection to minimize business risks. I have a strong background in Python, SQL, and data analysis techniques such as regression, classification, and clustering. My work in digital transformation projects has further enhanced my ability to apply AI and machine learning technologies in real-world scenarios.

At Etiqa, I also led cost analysis initiatives, analyzing trends in roadside assistance and creating actionable dashboards. Additionally, I spearheaded efforts to automate business news summarization by exploring open-source large language models, helping stakeholders stay informed of emerging risks. My ability to develop data-driven solutions aligns well with the goals of Petronas, and I am excited about the opportunity to contribute to your team.

I would welcome the opportunity to further discuss how my experience and skills can contribute to the company's objectives. Thank you for your time and consideration, and I look forward to the possibility of speaking with you soon.

Sincerely,

Nurul Haseena
